Properties

Free space below: 400 mm

Description

Our cloakroom bench, a plastic seating bench or changing room bench (2000 x 400 x H 450 mm), is specially designed for use in wet areas. This bench is ideal as an efficient and corrosion-resistant seating solution in swimming pools, saunas, and other humid environments. With a load capacity of 200 kg per linear meter, the bench provides sufficient strength for use by multiple individuals simultaneously. With a free space underneath of 400 mm, there is ample room for storage or easy cleaning underneath the bench. With its durable construction and practical design, this cloakroom bench is the ideal choice for use in wet environments where both functionality and durability are essential.
