

Euro pallet - A1 - 1200 x 800 mm - without rims - with anti-slip runners

Product specifications

Weight (kg)	18,5 kg
External dimensions (L x W x H)	1200 x 800 x 150 mm
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Grey
Material	HDPE
Static load capacity	7500 kg
Dynamic load capacity	1250 kg
Load capacity in racks	1250 kg

Properties

The A1's anti-slip pads prevent loads sliding off and mutual sliding of empty pallets

Standard version is without rim; can be produced as a special A1 version with rims 7 mm, 22mm, 22 mm outside

A1 with three runners lengthwise, underside of the runners with Palgrip antislip surface

Corrosion-protected reinforcement profiles, for a load-bearing capacity of up to 1,250kg in high rack

Welded runners with integrated anti-slip for a high standard of hygiene, safety and smooth running on roller conveyors

Description

Heavy-duty Europallet type A1 (1200 x 800 x H 150 mm) - food-safe, with reinforcement profiles for extremely high load capacity. Perfect pallet for trouble-free use in automatic pallet shuttle systems, transport on roller and chain conveyors, robotic handling, and machine loading and wrapping of pallets. Equipped with 3 longitudinal pallet runners, bottom runners closed and provided with Palgrip anti-slip. Without raised edges all around, with 24 anti-slip pads on the pallet deck and 6 integrated reinforcement profiles in the top deck, 4 longitudinal and 2 transverse. Static load capacity is 7500 kg, dynamic 1250 kg, and in pallet racks 1250 kg! The A1 pallets is very stable, highly impact-resistant, and extremely durable. A1 pallets offer high traction on roller conveyors and exhibit minimal deflection, even under heavy loads.

The dimensions of the A1 pallet are identical to those of the wooden Euro poolpallet.
