

Euro pallet - H1 ECO - 1200 x 800 mm (with rims and open runners)

Product specifications

Weight (kg)	16 kg
External dimensions (L x W x H)	1200 x 800 x 157 mm
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Black
Material	Recycled ECO-HDPE
Static load capacity	5000 kg
Edge height	7 mm
Dynamic load capacity	1000 kg
Load capacity in racks	500 kg

Properties

The H2 pallet (800 x 600 mm) centres on the H1 pallet

Raised rims around the H1 prevent the load sliding off and mutual sliding of empty pallets

H1 is extra strong due to oblique connection between the runners and the chocks

Description

The Europallet of type H1 ECO (1200 x 800 x H 157 mm), made from ECO-regenerated material, represents a sustainable approach to pallet design. This variant, focused on ecological responsibility, features three longitudinal pallet runners, open bottom blocks, and pallet runners. The design includes 7 mm raised edges all around, providing an additional protective layer.

With a static load capacity of 5000 kg and a dynamic load capacity of 1250 kg, this pallet offers robust performance for various applications. However, its load capacity is limited in specific pallet racks.

This Europallet of the H1 ECO type is not only functional but also environmentally friendly due to the use of regenerated materials. The pursuit of sustainability is emphasized through conscious design, where efficiency and environmental respect go hand in hand.
