Euronorm stacking crate - 600 x 400 x H 125 mm (reinforced base)

Product specifications

Weight (kg)	1,6 kg
External dimensions (L x W x H)	600 × 400 × 125 mm
Temperature range	-30°C to +80°C
Capacity	23 liter
Color	Grey
Material	HDPE
Bottom	Closed, reinforced
Sidewalls	Perforated
Handles	Open
Internal dimensions (L x W x H)	560 × 360 × 114 mm

Properties

Perforated stackable crate: 600 x 400 x H 125 mm - 23 liters, heavy-duty variant, versatile and robust for industrial and logistical purposes.

Food-grade characteristics, dark grey color, and two open handles for durability and functionality in demanding environments.

Ideal standard size for logistics centers, storage facilities, and distribution centers.

23-liter capacity accommodates various items; perforations in sidewalls ensure optimal air circulation, crucial for goods like food or sensitive equipment.

Equipped with a closed, reinforced bottom for sturdy support, preventing smaller objects from falling through, ensuring efficient and safe storage.

Dark grey color and food-grade suitability make it ideal for industries with strict hygiene standards, such as food and pharmaceutical sectors.

Two open handles facilitate lifting and moving, providing a convenient solution for various environments.

Exceptionally durable, designed to withstand demanding conditions in storage, transport, or distribution.

Offers a reliable and efficient solution, meeting diverse needs in different applications.

Description

The perforated stackable crate in the dimensions of 600 x 400 x H 125 mm - 23 liters, crafted as a heavy-duty variant, is a versatile and sturdy crate perfect for various industrial and logistical applications. With its food-grade characteristics, dark grey color, and two practical open handles, this crate is designed to offer durability and functionality even in demanding environments.

With its specific measurements of 600 x 400 x H 125 mm, this crate serves as an ideal standard size for usage in logistics centers, storage facilities, and distribution centers. With a capacity of 23 liters, it provides ample space for various items, while the perforations in the side walls ensure optimal air circulation, especially crucial for specific goods such as food or sensitive equipment.

Equipped with a closed, reinforced bottom, the crate ensures robust support for storing and transporting heavy loads. This reinforced bottom also prevents smaller objects from falling through the openings, contributing to efficient and secure storage.

Its dark grey color and food-grade suitability make this crate an excellent choice for industries with stringent hygiene standards, such as the food and pharmaceutical sectors. The two open handles facilitate lifting and moving the crate, making it a convenient and practical solution for diverse environments.

This exceptionally durable crate is designed to withstand demanding conditions and is successfully employed in situations that demand high levels of durability, hygiene, and versatility. Whether it's storage, transportation, or distribution, this perforated stackable crate caters to various needs and provides a reliable and efficient solution for different applications.
