Fillet box 10 kg - with drain holes

Product specifications

Weight (kg)	1 kg
External dimensions (L x W x H)	600 x 400 x 125 mm
Temperature range	-30°C to +40°C, briefly up to +90°C
Capacity	15 liter
Color	Blue
Material	HDPE
Bottom	Sloping base with four drain holes and sideways outlet in top rim
Sidewalls	Closed
Handles	Open

Properties

Filleting crates are stackable and nestable.

The nesting principle saves up to 70% of space.

Features a domed bottom construction with 4 drainage holes and lateral discharge in the top edge.

Sturdy design for trouble-free and long-lasting use.

Hygienic and easy to clean.

Description

Filleting crate with drainage system in Euro standard size of 600 x 400 mm and a height of 125 mm. The drainage construction in the top edge and base ensures optimal drainage of drippings and slime, preventing them from reaching the fish crate below. Filleting crates are stackable and nestable. Empty filleting crates can be nested, saving up to 70% of space. The filleting crate has a capacity of 15 liters and is suitable for loading 10 kg of fish. Due to the Euro standard sizing, these filleting crates can be efficiently combined with plastic pallets, bases, and roll containers without any loss of space.
