Properties

Geo Box pallet container

Dimensions: 1000 x 600 x H 1110 mm

Capacity: 385 liters

Standard small-sized plastic duo pallet box

Equipped with a bottom outlet of 120x120 mm

Centrally located in the tapered bottom of the pallet box

Description

Geo Box pallet container with funnel bottom (1000 x 600 x H 1110 mm - 385 liters). Two small-sized plastic pallet boxes are cut and weld together. The Geo Duo Box is equipped with a bottom outlet located centrally in the pallet box. In the lower part of the pallet box, a tapered hopper bottom is welded with a central opening of 120x120mm (optionally 140x140mm). This opening is closed by a slide valve that can be manually operated from the short side. The Geo Box with its smooth, funnel-shaped interior is ideal for controlled dosing of dry bulk materials such as granules, seeds, grain, dry animal feeds, pellets, and other small components. Thanks to the sloping bottom at an angle of 40°, the product flows easily outward when the slide valve is opened, eliminating the need for tilting and pouring. The container is also suitable for use with foodstuffs. This pallet box cannot be used for liquids and moist products unless a plastic liner is used. Max. load capacity per box: 225 kg.
