# Glass crate BASIC - 600 x 400 x H 198 mm for 15 glasses - max. height 169mm - max. Ø 106mm

## Product specifications

Weight (kg)	2,6 kg
External dimensions ( L x W x H)	600 x 400 x 198 mm
Temperature range	-40°C to +70°C
Capacity	38.3 liter
Color	Grey
Material	HDPE
Bottom	Perforated, reinforced
Sidewalls	Perforated
Handles	Open (four openings)
European Article Number	7424919462408
Maximum glass height	169
Maximum Ø glass	106
Internal dimensions (L x W x H)	568 x 368 x 183 mm

## Properties

The glass dimensions determine the choice of crate; measure the glass height and diameter at the widest point.

Glass crate sized 600x400 mm with a height of 198 mm for cleaning, storage, and transportation of glassware and dishes.

Suitable for glasses with a maximum glass height of 169 mm and a maximum Ø 106 mm; choose another crate in this series if the glass exceeds these measurements. Consult our advice for guidance.

The crate features a double compartment with 15 sections, providing 15 individual spaces for glasses and cups.

The double compartment ensures optimal protection for the most vulnerable part of the glass, the foot, against breakage.

The glass compartments prevent contact between glasses during cleaning, storage, and transportation, ensuring the glassware is fully clean after washing due to the coarsely perforated sides and bottom of the crate.

Euronorm glass crates are stackable and compatible with other Euronorm-sized dish racks and stackable crates.

These glass crates can be stored and transported without space loss on standardized bases, roll containers, and pallets.

For further information, please contact our product advisors.

## Description

**Please note before placing your order!**

**The dimensions of the glass determine the choice of crate. Measure the height of the glass and the diameter at the widest point.**

Glass crate 600x400 mm with a height of 198 mm for cleaning, storage, and transportation of glassware and tableware. This crate is suitable for glasses with a maximum glass height of 169 mm and a maximum Ø of 106 mm. The glass size determines which glass crate is most suitable. If the glass is taller than 169 mm or much narrower than Ø 106 mm, choose a different glass crate in this series. We are happy to advise you.

The glass crate features a double compartment with 15 slots, providing 15 individual spaces for glasses and cups. Thanks to the double compartment, the most fragile part of the glass, the base, is optimally protected against breakage. Due to the compartmentalization, the glasses do not touch each other during cleaning, storage, and transportation. The glassware is completely clean after cleaning in the glass crate. This is due to the coarse perforated side walls and bottom of the crate, allowing the rinse water and cleaning agent to easily access the contents.

The Euronorm glass crates are stackable and can be combined with other plate bins and stackable crates with Euronorm dimensions. Furthermore, the glass crates can be stored and transported without space loss on standardized supports, roller containers, and pallets. Contact our product advisors for more information.
