## Description

The harvesting container with dimensions 550x366x295 mm is specifically designed for harvesting and transporting fresh produce. This perforated crate is food-approved and features lowered sides to enhance cooling time, preserving the freshness of the harvest. The container is stackable for efficient storage and transport, and made from high-quality HDPE (High-Density Polyethylene), resistant to temperatures from -10 °C to 40 °C. Ideal for agricultural and other applications where fresh produce needs to be safely transported and stored.
