Properties

Usable as an insert bin in Euronorm 400 x 300 mm stacking bin, from an external height of 120 mm

Insert bins may be subdivided variously

Description

Black insert tray 1/4 made of food-grade plastic. Size 181 x 131 x H 101 mm. The black insert trays are stackable and nestable, saving 50% of volume when nested. With insert trays, you can easily create a compartmentalized storage in Euro standard stacking bins. These insert trays can be used in stacking bins, lid bins, and cases with dimensions of 400 x 300 mm and an external height of at least 120 mm. Four 1/4 insert trays fit lengthwise into a 400 x 300 mm stacking bin. Insert trays are available in various sizes and can be combined in Euro standard stacking bins with dimensions of 400 x 300 mm. This allows you to create a layout that suits the products you want to store. No assembly tools are needed to create a storage layout with insert trays; you simply place the insert trays in the stacking bin. The layout is flexible and can be changed at any time, as the insert trays are easily removable. The insert trays are also used in cabinets and drawers. Your items are organized and easy to locate. However, the insert trays are not suitable for stacking bins with dimensions of 300 x 200 mm or 600 x 400 mm.
