Insert bin 1/4 - PRO - 278 x 178 x H 230 mm

Product specifications

Uitwendig (LxBxH)	278 x 178 x 230 mm
Inwendig (LxBxH)	267 x 166 x 224 mm
Handles	Internal grab rims
Sidewalls	Closed
Material	PP
Article number	10.3.922.3
Weight (kg)	1 kg
Temperature range	-30°C to +80°C
Color	Grey
Bottom	Closed

Properties

Usable as an insert bin in Euronorm 600 x 400 mm stacking bin, from an external height of 250 mm

Internal grip rims simplify the removal of insert bins

Insert bins may be stacked together

The insert bins are manufactured with a reinforced base

Insert bins may be subdivided variously

Description

Insert tray made of food-grade plastic. Type PRO in size 277 x 177 x H 230 mm. Using insert trays, you can easily create compartmentalization in Euro-standard stacking containers of 600 x 400 mm. Four insert trays of size 277 x 177 x H 230 mm fit into these containers. These insert trays can be used in 600 x 400 mm stacking containers with an external height starting from 280 mm. Insert trays are available in various sizes and can be combined together within Euro-standard stacking containers. This allows you to create a layout suitable for the products you want to store. No assembly tools are needed to create compartments with insert trays. Simply place the insert trays into the stacking container. The layout is flexible and can be changed at any time. Type PRO insert trays feature an internal grip edge, making them easy to remove. In PRO insert trays, the transition from the inner wall to the base is beveled, creating a seamless and easy-to-clean surface inside the trays. There are no seams where dirt can accumulate. The insert trays have a reinforced bottom, enabling them to store heavier items without issues. Insert trays are stackable among themselves; this applies to trays of the same size and also for smaller trays on larger ones.
