Insulated with PU foam filling

Insulated container is provided with central door locking

Door hook on top of container to retain open door

Insulated container is provided with two rigid casters and two swivel castors, with galvanised housings and plastic wheels Ø 125 mm with PU tread.

Description

Mobile insulation container (955 x 735 x H 1770 mm - 720 liters) in a passive, exclusively insulating design. Internally on Euro Norm size. In these containers, Euro Norm-sized containers and crates, complete with contents, can be effectively chilled and practically transported. The insulation container is equipped with 2 fixed wheels and 2 lockable swivel wheels in a galvanized version with wheels Ø 125 mm and a PU tread. The door is fitted with a central locking mechanism with a two-point closure. Due to its excellent insulation, the temperature of the contents remains at the desired level for an extended period. The use of cooling elements can further enhance performance. A particularly robust container series that has proven its qualities in practice.
