Lid provided with two snap-slide locks

With two case handles on the short sides

Lidded bins have a removable, hinged lid

All lidded bins with case handle are stackable with lid

The lidded bin with case handle is provided with an extra strong diamond-pattern base

Description

Plastic case measuring 400 x 300 mm. The case has a capacity of 37.5 liters and a height, including the reinforced base, of 415 mm. Composed of a completely enclosed stacking container with a reinforced base, hinged lid with two snap-slide closures, and two handles on both sides. Thanks to the reinforced base, heavier loads can be transported in the case without any issues, preventing the bottom from sagging. Due to its Euronorm dimensions, the case perfectly fits standardized pallets, roll containers, and mobile bases. The case provides a secure seal during transportation, allowing for dust-free and safe transportation of goods inside. We supply seals and label holders as accessories for the cases.
