

Retention pallet with insert grid - 1200 x 1000 mm - 220 litre - 3 runners

Product specifications

Uitwendig (LxBxH)	1200 x 1000 x 395 mm
Capacity	220 liter liter
Material	HDPE
Article number	99.LB1210S.220.R
Weight (kg)	42,3 kg
Color	Grey

Properties

Containment pallet 1200 x 1000 x 395 mm (l x w x h) with containment cushion, on 3 runners, waterproof.

Volume 220 liters.

Description

Containment pallet with insert grate, both made of chemical-resistant plastic. Used for capturing hazardous substances and other dripping liquids. This containment pallet is also employed during the filling and emptying of barrels and cans. Thanks to the plastic insert grate, it prevents leaking products from remaining in their own liquid. A leaking oil drum, for example, will not sit in a pool of oil because the leaking liquid drips away through the grate. The drip tray has a Euro standard size of 1200 x 1000 mm and a height of 395 mm. With its design on 3 runners, the containment pallet is easily movable with a forklift or pallet jack. The dynamic load capacity is 500 kg. The containment capacity of the containment pallet is 220 liters.
