## Description

Grey pallet box type SB3 in dimensions 1200 x 1000 mm, equipped with flat, smooth inner walls that are easy to clean. The grey SB3 pallet boxes are perfectly stackable with similar pallet boxes and can therefore effortlessly integrate into an existing pool of pallet boxes. The SB3 is produced in one piece with 9 legs. Breakage at these sensitive points is thus minimized. The SB3 pallet box is stable, impact-resistant, and ideally suited for intensive use and where frequent tilting with a turntable is required. The lower wall panels of the pallet box are reinforced to prevent collision damage from forklifts. The grey box is made of 100% new and freeze-resistant material, making it highly suitable for applications in the food industry. Two standard provisions for placing RFID transponders are located in the upper edge. These transponders enable tracking and tracing of the box and cargo. The SB3 pallet boxes are equipped with a 1" outlet on one short side and a 2" outlet on one long side.
