SB3 plastic palletbox - perforated - 1200 x 1000 mm - with funnel base and slide valve - on 2 runners

Product specifications

Weight (kg)	55 kg
External dimensions (L x W x H)	1200 x 1000 x 790 mm
Temperature range	-30°C to +40°C
Capacity	500 liter
Color	Grey
Material	HDPE
Bottom	Reinforced with central bottom discharge
Sidewalls	Perforated
Max. load capacity per box	700 kg
Max. static stacking load	5000 kg
Max. dynamic stacking load	1200 kg
Internal dimensions (L x W x H)	1110 x 910 x 590 mm

Properties

Type: Perforated SB3 palletbox

Function: funnel bottom

Dimensions: 1200 x 1000 x H 790 mm

Capacity: 500 liters

Material: standard plastic

Bottom outlet: centrally located in the base of the pallet box

Description

The **perforated pallet box with a hopper bottom** from Transoplast is a versatile storage and transport solution, specifically designed for the controlled dispensing of dry bulk goods such as granulate, seeds, grain, pellets, and animal feed. This pallet box (dimensions: 1200 x 1000 x H 790 mm, capacity: 500 liters) features a unique funnel-shaped bottom with a central opening of 120x120 mm, easily operated with a sliding gate. This allows goods to be unloaded without tipping, saving both time and effort.

The perforated walls provide excellent airflow and moisture regulation, making them ideal for products that require ventilation. This pallet box is perfect for dry bulk materials and can also be used for moist products or food items with a plastic inliner. With a maximum load capacity of 700 kg, the pallet box is both robust and efficient, suitable for intensive use in various industries such as agriculture, food processing, and logistics.
