Shrimp box 20 kg - perforated

Product specifications

Weight (kg)	2,5 kg
External dimensions (L x W x H)	800 × 450 × 190 mm
Temperature range	-30°C to +40°C, briefly up to +90°C
Capacity	35 liter
Color	Blue
Material	HDPE
Bottom	Sloping base with four drain holes and sideways outlet in top rim
Sidewalls	Perforated
Handles	Open
Internal dimensions (L x W x H)	645 × 400 × 180 mm

Properties

Shrimp crates are stackable and nestable.

The nesting principle of the crates saves up to 73% of space.

Equipped with arrow markings as visual stacking-nesting aids.

Perforated side walls and a vaulted bottom with 4 drainage holes.

Featuring a roof bottom construction with 4 drainage holes and lateral drainage in the upper edge.

Extremely robustly constructed for a long lifespan.

Description

Shrimp crate (800 x 450 x H 190 mm - 20 kg / 35 liters), with perforated side walls and four drainage holes in the bottom. Shrimp crates are stackable and nestable. A directional arrow marking on the top edge serves as stacking-nesting aid. The nesting principle saves up to 73% of space. Shrimp crates feature a closed roof bottom with drainage holes in the four corners, allowing for the drainage of excess water, slime, etc. A construction in the upper edge of the crate below ensures lateral drainage, preventing excess water, etc. from entering the crate below. A particularly robust crate that is successfully used in the shrimp industry and at various fish auctions.
