Description

Plastic stackable crate in Euro standard size 600 x 400 mm with a height, including the reinforced bottom, of 224 mm. A very strong stackable crate with coarsely perforated side walls and bottom. Equipped with four open handles. The bottom is extra reinforced; even under heavy loads and extreme conditions, bending is virtually negligible. This robust stackable crate is versatile and possesses all the qualities for trouble-free use in the (industrial) food sector, textile industry, hospitality, and bakeries. When equipped with dividers, the stackable crate becomes an ideal glass crate. The stackable crate made of food-safe plastic features a stable construction. Thanks to its Euro standard dimensions, the stackable crate can be perfectly combined with standardized stackable containers, crates, pallets, roll containers, and mobile bases.
