Properties

Stackable crate light with perforations in the bottom and side walls

Equipped with two open handles

Light reinforced bottom

Ideal for universal use

Dimensions: 400 x 300 x H240 mm

Description

Plastic stacking crate light in Euro norm size 400 x 300 x H240 mm. The applications of these crates are versatile and can range from use in the food industry, such as transporting vegetables and fruits, to warehouses for storage and distribution of goods. The perforated bottom with light rib reinforcement ensures that products remain well-ventilated, making them highly suitable for use in controlled environments. Although it is not possible to add compartment dividers to the light crates, there is plenty of space to store products.
