

Stacking nestable bin - 600 x 400 x H 200 mm - perforated

Product specifications Properties

Uitwendig (LxBxH) 600 x 400 x 200 mm

Capacity 30 liter

Handles Open (two openings)

Sidewalls Perforated

Material PP

Article number 3602.720

Weight (kg) 1,6 kg

Temperature range -30°C to +80°C

Color Grey

Bottom Perforated

MARS bins are stackable and nestable.

Upper edge of MARS stacking nestable bins is a hollow section and thus very stable.

Description

De MARS series offers a versatile stackable-nestable crate measuring 600 x 400 x H 200 mm with a capacity of 30 liters. These crates boast features ideal for the food industry, being both stackable and nestable, ensuring efficient storage and transportation. Crafted to meet food-grade standards, these crates are equipped with perforated side walls and a perforated bottom, facilitating proper ventilation and drainage.

The design incorporates open handles for easy handling and maneuverability. One distinctive aspect of the MARS crate is its upper edge fashioned into a closed tube shape. This unique tube-like structure significantly enhances the crate's strength, stability, and most notably, its hygiene standards. The seamless, closed tube design prevents dirt accumulation and makes cleaning effortless, ensuring optimal cleanliness for sensitive food-related applications.

Primarily utilized within the food sector, particularly in the fish industry, the MARS crate proves indispensable due to its hygienic properties and durability. However, its versatility extends beyond the food industry, finding successful applications in various other sectors due to its robustness and adaptability to different storage and transport needs.
