Bins are stackable and nestable

Completely smooth form with very few ribs

Description

This stackable-nestable container, measuring 800 x 600 x H 330 mm and offering a generous capacity of 110 liters, has been meticulously designed with a completely smooth and hygienic surface. It complies with the highest standards for food safety and is perfectly suitable for use in the food industry.

The container features a closed bottom and sidewalls, ensuring secure and protected storage of contents without the risk of leakage or external contamination. Additionally, it is equipped with two sturdy, closed handles in the shape of bowls. These handles not only provide an easy way to lift the container but also prevent dirt accumulation, thus promoting the maintenance of a hygienic environment.

Thanks to its smooth and hygienic properties, this stackable-nestable container is indispensable in various environments where hygiene and functionality are crucial. Whether it's for storage in food processing facilities, distribution centers, or other industries, this container ensures safe and efficient storage of goods, with extra attention to hygiene and user convenience.
