Description

Transport container / brine tank (950 x 720 x H 825 mm - 400 liters) on four legs, with stainless steel edge reinforcement. Transport containers are somewhat conical and therefore nestable. The walls and the bottom are completely closed and exceptionally smooth, without external rib structures. Thanks to the use of high-quality HDPE, the containers are particularly impact-resistant. The containers are very easy to clean and are mainly used when good hygiene is essential.
